Hi Utkarsh,

Thanks for sharing.

This looks v good – you may go ahead and submit to NUS after following 2 edits:

- Redacting identifiable product information from the figures e.g. Aveeno in fig 6, fig 11; Neutrogena or Nicorette in Appendix 2 fig 3, and all other such cases.
- Changing ‘pharmaceutical and consumer health giant’ in Introduction to ‘large healthcare company’, to keep it more anonymised.

Thanks for all your hard work and contributions to this project – looking forward to making it ‘live’ with our ongoing pilot with Japan Consumer business!

Best regards,  
Sahil

Hi everyone,

PFA the final versions of my paper and poster for your consideration. Any feedback is still welcome as I have some time before submission. On my end, the paper has been reviewed by my academic supervisor – Prof. Teo Thompson (in cc).

I would need an attestation from J&J about this paper being available in public domain for final submission. From NUS's checklist, the text for this reads: *"The company has agreed to this paper being in the public domain"*. I would require **one of the mentors to reply back on this mail confirming the same**, upon which the mail chain would be submitted along with the paper to the school.

I have ensured that the name of the organisation does not appear anywhere in the paper and that there are no financial numbers written directly or put in via an image in the paper. Please feel free to reply if there are any other concerns.

Thanks & Regards,  
Utkarsh Chaturvedi
